## How Do Environmental Health Officers Support Healthy Food Environments?

Tina Chen  
National Collaborating Centre for Environmental Health  
[tina.chen@bccdc.ca](mailto:tina.chen@bccdc.ca)

Healthy built environment (HBE) refers to the man-made and natural environments and settings in which people live, work, and play. The [BCCDC Healthy Built Environment Linkages Toolkit](#) defines the built environment through five core features, one of which is food systems. From the agricultural cultivation of foods to the sale and consumption of foods, global and local food systems play an integral role in shaping the availability and affordability of foods. A healthy food system provides equitable access to nutritious, safe, and affordable foods.

Within a food system, food environments influences the acquisition and consumption of foods through factors such as food pricing, accessibility, availability, marketing, food quality, convenience, and properties of food sources and outlets.<sup>1</sup> A healthy food environment promotes the purchase and consumption of healthy foods such as fruits, vegetables, whole grains, and healthy snack options in various food outlets. As one of the determinants of health, the safety and nutrition quality of the food that people consume ultimately impact their health outcomes.<sup>2</sup> Poor diet is one of the modifiable risk factors of chronic diseases and conditions such as cardiovascular diseases, some cancers, stroke, diabetes, and obesity.<sup>3</sup> Mental illnesses such as depression and anxiety disorders have been linked to suboptimal diet patterns, and those with mental

illnesses have an increased risk of developing chronic diseases.<sup>4</sup>

In Canada, chronic diseases rank highly in the leading causes of death.<sup>5</sup> Three out of five Canadians over the age of 20 have a chronic disease and four out of five are at risk of developing one or more.<sup>4</sup> The direct and indirect economic burden of not meeting food recommendations costs an estimated \$13.8 billion/year

# Branch Update

As we approach the last weeks and months of 2019, now is a good time to reflect on what we've accomplished over the past year, and what's still to come. While we're still finalizing some of the "big ticket items" that we've been working on (e.g. a webinar series), the attendance and participation by BC Branch members at the 2019 AEC in Dartmouth was a testament to the industry-leading work that you all are doing daily, and shows that the strength of the BC Branch lies within its members.

It's safe to say that, by all measures, AEC 2019 was a huge success. The social events were sold out, the number of registrants *far exceeded expectations*, and the power was restored before the first keynote took the stage. *Huge kudos to our hosts from the Nova Scotia & PEI Branch and the Cities of Dartmouth and Halifax, and to the venue for the business continuity planning in light of an unprecedented hurricane. I'd like to recognize that eight presentations were delivered by BC Branch members, with an additional two from the NCCEH who are hosted at the BCCDC. Our branch also had significant participation in the National AGM, thanks in no small part to the contingent of Northern Health members who were able to participate remotely.*

Environmental Public Health Week 2019 was also a great opportunity for our profession to promote itself and the work that we do, both Nationally and at the Branch level. We received a proclamation from the Provincial Government recognizing the week, Health Authorities, through their communications teams recognized the work of environmental health professionals, and there were celebrations at various offices. Nationally, we saw CTV Winnipeg make an entire programming block on their morning show available for EHOs to talk about our work, and inform the public. I look forward to continued and improved engagement with the public on environmental health topics not only for 2020's EPH Week, but throughout the entire year.

Our 2019 AGM is fast approaching, and by now you should have received a call for nominations in your email. Our work relies on volunteers to succeed, and we're always looking for additional hands to volunteer, or even to participate on our Executive Council. Essentially every Executive position is open for nominations each year at the AGM, with membership in attendance voting on their preferred candidates. This year, we also have a vacancy for President-Elect currently (which is for a two year term), and are seeking interested candidates for that role. Please see further down in this issue for information on the positions, and don't hesitate to contact me if you have any questions.

While 2019 has rocketed by, it's nice to look back on the year and see that we've had some significant successes. The implementation of items like mandatory membership and a progressive compliance model, forthcoming changes to the CPC framework based on member feedback, modernization of the BOC process, and increased advocacy for our profession are all items that make us a stronger group. They also establish a strong framework for our future successes, which I look forward to building with you all in 2020.

Yours Truly,

Casey Neathway  
BC Branch – President

## How Do Environmental Health Officers Support Healthy Food Environments? Continued. . .

in Canada.<sup>6</sup> Such significant personal and economic burdens of chronic illnesses prompt public health policy-makers and practitioners to seek out opportunities to reduce adverse population health outcomes due to unhealthy eating.

Within regional and local health agencies, health promotion and health protection work are often conducted independently, often with minimal internal communication and consultations. However, new synergies can be created through collaborations between public health teams. Environmental health professionals can influence and advocate for changes to the built environments to target upstream determinants of health. As front-line practitioners, EHOs are in a unique position to promote healthy food environments by utilizing their networks and connections with operators and partners in the communities in which they serve. As EHOs conduct routine inspections in various settings and provide consultations to operators, they are appropriately situated to raise awareness about the importance of healthy food environments.

Researchers have identified four aspects of the food environment that influence food choices:<sup>7</sup>

- **Community food environment** refers to the geographic access to food, including the number, location, and types of food outlets. Examples include the availability of and access to grocery stores, corner stores, fast food restaurants, full-service restaurants, farmer's markets, and mobile food vendors
- **Consumer food environment** refers to the features within a food outlet that modifies the shopping experience, such as availability, quality, pricing, and product placement
- **Organizational food environment** refers to the type of food and beverages available for sale in settings such as recreational facilities, government buildings, schools, and hospitals
- **Information environments** refers to nutrition labelling and marketing/advertising

Within each of these aspects, there are numerous opportunities for environmental health practitioners

to become involved. Many of them can be incorporated in tandem with traditional roles of environmental health practice. Examples of these opportunities have been identified in the literature:<sup>8,9</sup>

- Retail food environment interventions such as in-store promotion or healthier options, pricing promotions, nutritional menu labelling, healthy check-out lanes, healthy corner stores
- Food procurement policies in large organizational or institutional settings
- Zoning, by-laws, taxation, or fee-reduction policies to encourage healthy retail stores and vendors, or to limit fast-food restaurants and less healthy options such as sugar-sweetened beverages
- Promoting community and school gardens
- Advocate for improved transportation and access to grocery stores

Across Canada, some environmental health professionals may have implemented some or parts of these interventions into their work. Others may collaborate with their health promotion colleagues in different capacities to support healthy food environment initiatives in their communities.

To facilitate knowledge exchange and capacity building for environmental health professionals on the variety of food environment work their colleagues in other provinces may be involved in, the NCCEH is gathering firsthand stories and experiences across Canada. The consultation period will conclude in November and results are expected to be published on the [NCCEH website](#) in early 2020. Please reach out to [Tina.Chen@bccdc.ca](mailto:Tina.Chen@bccdc.ca) if you would like to provide input, or to learn more about this project.

# BC Branch Executive Update

The CIPHI BC Branch has two exciting opportunities on the Executive Committee, now open for nominations. Presently the roles of President Elect and Secretary have no incumbents, which presents us with a great opportunity to welcome new members to the Executive to share their thoughts and ideas, and lead the development of the Branch.

The roles of the President Elect (2 year term) include:

- Acting as the presiding officer for Executive Council meetings
- Representing the Branch at the National Executive Council when the President is not available
- Preparing meeting agendas (with input from the Executive and Branch members)
- Providing Branch updates for the BC Page (twice a year)
- Learning the duties of the Branch President in preparation of assuming the role

The roles of the Secretary (1 year term) include:

- Recording minutes of Branch meetings
- Conduct correspondence on behalf of the Branch
- Issuing notices and associated documents and updates for the Annual General Meeting
- Managing the document storage of the Branch Google Drive account

If either of these positions are of interest to you, we welcome your nomination form and look forward to seeing you at the AGM! If you have additional questions about either role, please contact Branch President Casey Neathway at [president@ciphi.bc.ca](mailto:president@ciphi.bc.ca).

Hello CIPHI members and environmental health professionals alike! Welcome back again to Giardia's Corner with me, Giardia! Fall leaves are falling, crisp, wet weather has arrived, and our daylight has dwindled away. I made my way to the East Coast for the AEC and got a chance to take in a hurricane, a couple of comedians, and all the lobster I could handle. Dartmouth/Halifax are beautiful and welcoming. Make sure to take a look at the highlights from the event starting on page 8. Also make sure to take a read below to get to know Aletta Amell, one of the most recent additions to the BC Branch Executive.

Now that you've done your civic duty and voted, get out there and get that flu shot!

## Aletta Amell — BC Branch Councilor

### **Q1: What school did you go to for the ENVH program? What year did you graduate?**

A1: I attended Concordia University College of Alberta but I graduated from Concordia University of Edmonton. They changed the name during my practicum. I graduated in 2015.

### **Q2: Where have you worked and what roles have you been in throughout your career?**

A2: I completed my practicum at Thunder Bay District Health Unit, in Ontario, along with a short term with the CDC team. I worked in Cypress Health Region, Swift Current SK, for three years in the generalist role, everything from CD to plumbing. I'm now at Northern Health working in the rural areas. Prior to EHD I've worked for the Oilers in Edmonton, at a winery, in the family food truck, and in a microbial research lab with *Listeria* sp. and *E. coli*.

### **Q3: How have you seen the focus of Environmental Public Health change over the years?**

A3: I haven't been working long enough to answer this question! However, I do see Environmental Public Health focus change from province to province.

...Continued on Page 6

I predict we will be moving back away from the small scale, looking at individual restaurants, to the large scale again. Focus on environmental impact on our lives.

**Q4: What is one of the most memorable moments or situations in your career so far?**

A4: My practicum was a wild ride. About a week in I had the opportunity to join a seize event. MTO tipped us off that a truck was delivering unrefrigerated food so we met it with our own truck at its destination and seized 500kg of seafood and other meats.

**Q5: As an EHO/PHI, one of your primary roles is to look for problems or issues; how have you stayed positive?**

A5: Every problem corrected is one outbreak prevented. I take a lot of pride in the little moments when you can tell you have educated someone on the right thing to do and they are genuinely happy to learn..

**Q6: On a scale of Educator to Enforcer, where would you place your health inspector style?**

A6: Working in SK made me an Educator. I learned the power of "I'm not mad, I'm just disappointed." Although once I'm sure someone is educated, but just not complying, I can quickly switch to Enforcer.

**Q7: Legislative recognition for CIPHI passed in Sept 2013 and mandatory membership was implemented in January of 2017, what do you see as the next big goal for CIPHI' BC Branch?**

A7: Connectivity! Whether it be video conferences, physical conferences, digital platforms, or simply just creative outreach, connecting throughout the province is hard but possible.

**What is your favourite indoor/outdoor activity?**

Running / training with my puppy.

**What do you miss most about being a kid?**

Sleeping in.

**What is one of your favourite quotes?**

Start by doing what's necessary; then do what's possible; and suddenly you are doing the impossible—Francis of Assisi

**What is something you learned last week?**

Great question! This week I'm starting my MPH at Waterloo. I've learned so much.

**WHICH WOULD YOU RATHER:**

**1. Use Facebook or Twitter?**

Facebook. I haven't figured out Twitter. Although, Instagram trumps both.

**2. Read a Kindle or a paperback book?**

Paperback.

**3. Swim in a pool or the ocean?**

Pool. The ocean is cold.

**4. Watch sports or play sports?**

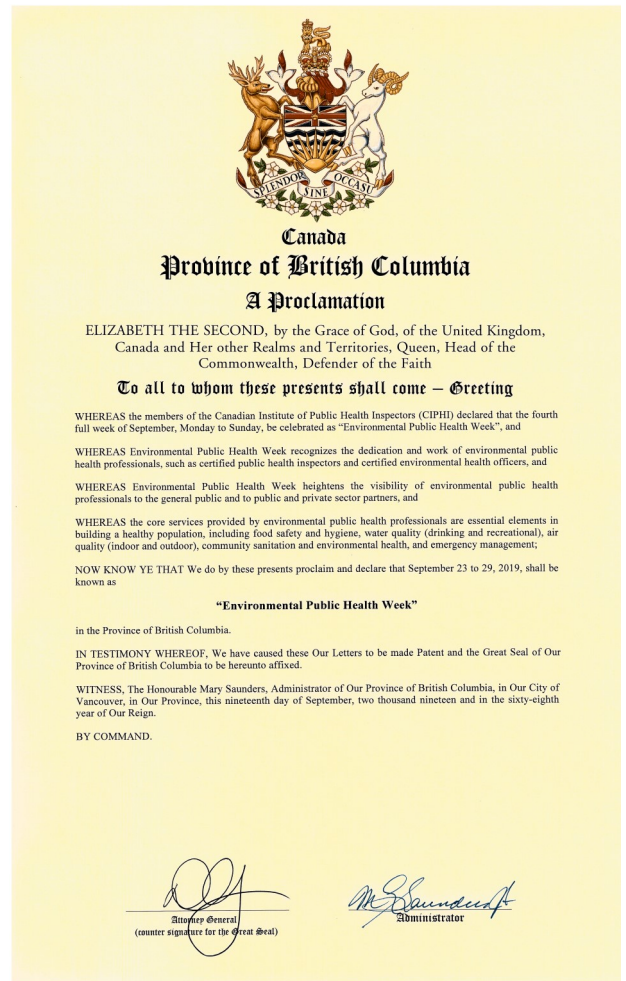

Play Sports. All sports but hockey.

"I'm the health inspector... the burger joint's natural enemy."

Environmental Public Health Week was celebrated September 23—27, 2019 with the inspiring theme of “Exploring the Edge”. The theme highlighted the ever-forward motion that Environmental Public Health professionals are faced with as our environmental public health issues evolve and emerge. This year, the BC Branch successfully had Environmental Public Health Week proclaimed by the Province of British Columbia. An emboldening feat in recognition of the hard work that we Environmental Public Health Professionals do everyday.

The Northern-Interior office of Northern Health celebrated Environmental Public Health Week with a cake. (Back left to right—David Ho, David Creighton, Neelam Hayer, Yvonne Liang, Brian Steeves, Jasmyn Jaynes and front left to right—Daisy Tam, Aletta Amell)

The VCH Environmental Health staff received kudos for their tireless efforts and an acknowledgement of EPH Week from their organization. The article highlighted their over-80 staff and more than 46,000 inspections. Well done VCH Environmental Health team!

## 2019 Annual Education Conference—Dartmouth/Halifax

Try as Hurricane Dorian might, the 2019 AEC was an abundantly successful event. The conference opening ceremonies went forward with no lights, no audio-visual, and unfortunately, no hot showers for those staying at the hotel. The event was declared as the “Conference of Bad Hair” by our National President, Kari Engle-Carter. However, as pointed out by Casey in the Branch Update, with the utmost of luck and thanks to the hard work of many hydro crews, power was restored before the first keynote took the stage.

BC made an excellent showing at the conference; there were delegates from the Provincial and First Nations Health Authorities, retired members, BCIT staff, and staff from the NCCEH. Many of our BC attendees were also presenters offering up their West Coast experiences and knowledge.

Many thanks to the planning committee and the East Coast hosts for putting on a fantastic educational conference and providing unforgettable social events! A big thank you to Sean O’Toole, with the Nova Scotia Branch, for making his photographs available at the following link: <https://www.flickr.com/gp/184463265@N03/8G18ta> . Take a look at some of the highlights below.

The BC Delegates: Top to Bottom First Column— Sam Sew, Sion Shyng, Keith Herle, Tim Roark, Lydia Ma, Juliette O’Keefe, Top to Bottom Second Column—Gary Tam, Kuljeet Chattha, Stacey Sowa, Dr. Michael Schwandt, Angela Wheeler, Top to Bottom Third Column— Casey Neathway, Charlene Tang, Ann Thomas, Jack Davidson, Top to Bottom 4th Column—Harry Dhaliwal, Kate Wilkinson, Tracie Cheung, Samson Wong, Paolo Ciocca (Missing Courtney Hesketh, Jennifer Jacobsen, Greg Baytalan, Gethsemane Luttrell, Keir Corder, John Chong, Spencer Dawson, Sara Li, Debby Peng)

National President, Kari Engele-Carter, and BC Branch President, Casey Neathway.

Jennifer Jacobsen accepting the NSF Food Safety Award on behalf of Ildiko Herr from EHFC's Pamela Scharfe.

Courtney Hesketh presenting: Cold coffee and clostridium: Who ever thought?

Debby Peng presenting: Paralytic shellfish poisoning associated with butter clams.

Casey Neathway presenting: Indigenous Food Safety and Security

Jennifer Jacobsen presenting: Emergency Response—What is an SBAR?

Lobster Demo!

Greg Baytalan presenting: Radon Gas, New Radiation Effective Dose

National President Kari Engele-Carter and Past-President, Ann Thomas with Giardia.

## Alex Cross Award

Kevin Kapell, Saskatchewan Branch President, presenting the ever-deserving Keir Cordner with the 2019 Alex Cross Award. Congrats Keir!

### The Nomination:

We are nominating Keir Cordner for the Alex Cross Award for his enthusiasm and dedication to the Council of Professional Experience. Through Keir's significant contributions to CoPE and CIPHI at large he has strengthened the professional standards of the Canadian Institute of Public Health Inspectors. Without Keir's leadership, CoPE would not have been prepared for fundamental changes that were needed to launch the mandatory membership model.

Keir Cordner has been a prominent figure of CoPE since the launch of the CPC program. He acted as BC representative on CoPE from 2013-2015, then took on the role of CoPE Chair from 2015-2017. In his role as Chair, Keir ensured that CoPE was strongly connected with all the communications and preparations for mandatory membership at the National Executive level. He ensured that CoPE was fully engaged in the work on the progressive compliance cycle, the audit results appeal process, and the suspension and reinstatement of CIPHI(C) credential which meant that these bylaws were a truly collaborative effort with the NEC.

Not only has Keir been a prominent figure of CoPE, he is a well-known advocate of CIPHI both at his workplace and in the larger CIPHI community. Keir acted as BC Branch President from 2009-2011 where he excelled as a collaborative leader; created a fundamental budget model for CIPHI; and initiated BC Branch strategic planning that resulted in changes in roles, new awards and setting the BC Branch in a strong forward direction. He also led and successfully lobbied the Ministry of Health to legislate C.P.H.I.(C) credential in the current BC Public Health Act. Keir's current work includes providing environmental public health services in partnership with First Nations communities on Vancouver Island. A position in which he is an advocate for the inclusion of cultural safety and humility into the work.

We are so fortunate to have Keir as part of our CIPHI community and are honoured to nominate him this year for the Alex Cross award.

Jenny Brown – CoPE Chair & Gary Tam - BOC Representative - BC Branch

During the National CIPHI Annual Education Conference hosted by the NS/PEI Branch in Halifax, delegates helped celebrate the **30th Anniversary** of the Environmental Health Foundation of Canada (EHFC), the Charitable Division of the Canadian Institute of Public Health Inspectors (CIPHI).

The EHFC Board of Trustees has set a goal of raising **\$30,000** to create two new endowment funds **(1)** to support student attendance at the National CIPHI Annual Education Conference, and **(2)** to support an annual environmental public health aid project in Canada or Internationally.

The EHFC Board Trustees organized several 30<sup>th</sup> anniversary celebration events during the conference:

The EHFC Board Trustees celebrated the 30<sup>th</sup> with cupcakes.

L to R: Melissa McDonald, Victor Odele, Tim Roark, Laurie Pike & Pamela Scharfe

The EHFC supported 11 students from CBU, Ryerson & Conestoga by paying their conference registration fee. CBU also supported an additional 6 students.

The EHFC organized an online & onsite silent auction. The BC Br donated a gift basket to the auction. CIPHI Past President Ann Thomas checking out the auction table & the online app.

The EHFC held a 50/50 draw with ticket buyers having the chance to win half of the ticket sales; their photo taken to be used for the 30<sup>th</sup> mosaic banner & a pair of CIPHI EHFC swag sunglasses. CBU student Alan Raju won the 50/50 draw.

**Environmental Health  
Foundation of Canada**  
*Celebrating 30 Years*

**Fondation canadienne  
de l'hygiène du milieu**  
*Fêtons nos 30 ans*

Prior to the CIPHI President's Banquet, EHFC Chair Pamela Scharfe presented CIPHI Past President Ann Thomas & CIPHI President Kari Engele-Carter with EHFC lapel pins to honour their support & commitment to CIPHI's Charitable Division.

The EHFC have reached 26% of their goal and only have 62 days left to reach 100% of their goal. In May all CIPHI members received an invite in the mail asking CIPHI Members to consider donating \$30 to celebrate 30 years. All donors are also asked to provide their photo so it can be included in a mosaic banner that will be unveiled at the 2020 National CIPHI conference.

Please join CIPHI BC Branch Members, Tim Roark (EHFC Trustee & Founding Board Member) & Keir Cordner in donating to CIPHI's charity. Go to [ehfc@outlook.com](mailto:ehfc@outlook.com) to learn how you can donate.

**THANK YOU FOR YOUR SUPPORT!**

# CoPE: Behind The Scenes

Our team meets monthly and administers the Continuing Professional Competencies (CPC) Program, including the entering and auditing of Professional Development Hours (PDHs). Many hours of hard work are put in to ensure that the CPC Program runs smoothly and that questions are answered.

## Who makes up our team?

**Back Row (L to R):** Peter Ross (Saskatchewan); Keir Cordner (Past-Chair, BC); Daniel Petrie (New-Brunswick/Quebec); Lorelle Pegus (Manitoba); Jason MacDonald (National, AB); Darcy Garchinski (Alberta/NWT/Nunavut)

**Front Row (L to R):** Karen Hann (Newfoundland and Labrador); Debbie Hylton (Ontario); Jenny Brown (Chair, AB); Stacey Sowa (British Columbia/Yukon), Beth Driscoll (Ontario), Stephen Ferguson (Nova Scotia/Prince Edward Island)

**Contact your Branch Representative or email CoPE with questions or inquiries: [cope@ciphi.ca](mailto:cope@ciphi.ca)**

# C.I.P.H.I. BC Branch 2019 Christmas Luncheon & AGM

Date: December 5, 2019, Thursday

Time: 11:30 am to 1:00 pm

Place: Mahonys & Sons at Stamps Landing

601 Stamps Landing, Vancouver, B.C.

**Save the day!!**  
More information to come

RSVP is required.

To register go to:

<http://bit.ly/CIPHIBC2019>

**YOU KNOW WHAT  
REALLY GRINDS MY  
GEARS . . .**

“When an operator informs you of their perfection but ooh...that facility over there...yikes...”

Please submit your “heard it a thousand time before one-liners” that you hear in the field over and over to [bcpageeditor@ciphi.bc.ca](mailto:bcpageeditor@ciphi.bc.ca). Let’s all share in the hilariously annoying joys of our environmental public health experiences.

## In Memoriam—Peter Jemmeson

Peter Jemmeson was born in Darlington County, Durham, England in 1934. After schooling he started his training as a Sanitary Inspector in 1950 with the Darlington Rural District Council in the Public Health & Engineering Department. In 1956 he received his Certification as a Public Health Inspector from the Royal Society of Health. For the next 4 years he continued employment with the Darlington Council Public Health & Engineering Department now as a Public Health Inspector. During this time Peter also was awarded R.S.H. Certification for Meat and Foods Inspection. In 1957 Peter married Brenda, an RN, and in the years to come had 3 daughters and 7 grandchildren. In 1960 Peter moved to the Stokesley Rural District Council as the Senior Public Health Inspector. 1968 brought a major change as Peter moved to the Channel Islands as a Public Health Inspector with the Jersey Civil Service for the next 3 years.

Canada looked very promising in 1972 so Peter, Brenda and family immigrated to Canada and he started work with the Chatham Kent Health Unit in Ontario. During this time he received his CPHI(C) from the Board of Certification. Beautiful BC called and in 1973 Peter and Brenda moved to a new position as a PHI with the Upper Island Health Unit in the remote community of Port Hardy. 1974 brought another move to Vernon with the North Okanagan Health Unit. In 1981 Peter and Brenda moved again this time to the Capital Health Region and beautiful Greater Victoria. Peter enjoyed his work, colleagues and the location so much that he stayed on Vancouver Island after retiring in 1999.

His colleagues spoke highly of Peter stating, “It has been a 17-year privilege to work alongside Peter” and “We in the CHR have been blessed with the catalytic forces of Peter Jemmeson” as two of many kind words regarding his skills as a PHI. His leadership with the BC Onsite Sewage System Association as a member of the Advisory Committee was very important. His participation in the development of the sewage contractor course curricula, then teaching in the program at Royal Roads University for 5 years plus participation in the establishment of the sewage system demonstration facility there were very positive contributions.

Peter was also very involved with the BC Branch of CIPHI first as an Executive Councillor in 1987 and 88. In May of 1988 through 1990 he was an active member of the BC Board of Registration as the Representative for Vancouver Island. In May of 1990 Peter took on the role of Secretary for the Board of Registration for the next two years. His positive contribution to his profession as a Public Health Inspector and a Member of the CIPHI Board of Registration was well recognized and most appreciated.

In 2018 Peter and Brenda moved to Coldstream near Vernon where their middle daughter, Kate, and one granddaughter reside.

Peter passed away on August 12<sup>th</sup> 2019 at the age of 85. He will be sadly missed by his family plus many friends and colleagues.

Tim Roark,  
Historian, BC Branch

*Many thanks to Mrs. Jemmeson as well as colleagues and good friends Jill Campbell, Gary Gibson and Erwin Dyck for their assistance with this info*

## In Memoriam—John Larry Jarvis

Larry Jarvis was born in New Westminster, BC on June 13, 1952. After graduation from high school, he enrolled in the Public Health Inspection program at BCIT. Larry completed the PHI Program in 1974 and was awarded his CIHI (C) shortly thereafter. Larry started work in the Cariboo Health Unit, first stationed in 100 Mile House and then he transferred to the head office in Quesnel. In 1978, he moved to the Northern Interior Health Unit and was stationed in Prince George. In the mid 1980s, Larry decided to move south to a position in Nanaimo with the Central Vancouver Island Health Unit. Larry retired when he was 55 in 2007 to enjoy a life of leisure. He was a quiet person who had a dog Mitzi and enjoyed gambling. Larry and Richard Hicks would often meet and discuss the important issues of interest.

Larry passed away on August 5<sup>th</sup> 2019 at the age of 67 after a short battle with Cancer. He is lovingly remembered by his parents Jack and Gertie Jarvis, cousins Colleen and Ivan Jolivet, his Aunt Connie, Uncle Len, dear friends Kathy, Richard and Ken, and many other aunts and uncles, cousins and friends. Donations in memory of Larry may be made to the SPCA.

Many thanks to Kathy Obad, Richard Hicks, and Glen Smith for this information.

## Editorial Policy

The objective of this newsletter is to keep the members of the BC Branch and other colleagues informed of the local and national events that are of interest and importance to them.

The views, comments, or positions of the BC Page are those of the Editorial Team or the author and do not necessarily reflect those of either the BC Branch or the Canadian Institute of Public Health Inspectors.

The Editorial Team reserves the right to edit material submitted, solicited or unsolicited, for brevity, clarity, and grammatical accuracy.

## Advertising Policy

The BC Branch will accept advertising relating to health & environmental issues, products, and services. Advertisements that the editorial team concludes are contrary to good public health practice or environmental protection goals, or those deemed offensive or not in good taste, will not be accepted.

### Advertising Rates

FULL PAGE.....\$75 per issue

HALF PAGE.....\$50 per issue

QUARTER PAGE.....\$30 per issue

BUSINESS CARD.....\$20 per issue

There is a 25% discount for a commitment of at least six consecutive issues. Changes can be made in the ad format or content during this period. Ads should be camera-ready; any extra costs necessary to prepare the ad material may be charged to the advertiser.
