Title: Requirements for Foreign-Trained Environmental Public Health Professionals Seeking the CPHI(C) Credential

Approving Body: Board of Certification of the Canadian Institute of Public Health Inspectors

Effective Date: 31-OCT-2020

Last Revised Date: 02-FEB-2023

8.1 Purpose

This policy prescribes the process and requirements for foreign-trained environmental public health professionals who have not successfully completed a BOC accredited program and are seeking CPHI(C) designation.

8.2 Definitions

BOC means the Board of Certification of CIPHI.

BOC accredited programs means those environmental public health (EPH) programs recognized by the BOC of CIPHI as granting degrees that are acceptable to the BOC, subject to *BOC Regulations* 14(1)(a).

CIPHI Office means the administrative service company contracted by CIPHI's National Executive Council.

Candidate means, exclusively in Policy 8, a foreign-trained environmental public health professional seeking CPHI(C) credential.

Discipline Specific Competencies means the set of competencies specific to the field of environmental public health. These competencies describe the essential knowledge, skills and abilities necessary for the ongoing success in the role of an EHO or PHI.

EHO / PHI means Environmental Health Officer or Public Health Inspector

Equivalency exam means an assessment designed to measure the academic competencies of a foreign-trained candidate and equivalency to competencies that would be gained from the successful completion of a BOC accredited program in Canada.

Exam Coordinator means a regular CIPHI member appointed for a term of three (3) years, and a maximum of two (2) terms by each branch of CIPHI, who may or may not be a member of the BOC, an instructor or faculty of an BOC accredited EPH program and who is not responsible for practicum training of candidates.

Exam proctor means a regular CIPHI member selected by the Exam coordinator to supervise a candidate while they write the equivalency exam.

8.3 Background

The recognition of qualifications and experience for foreign-trained environmental public health professionals has been a discussion item for a number of years. The BOC has changed its position from allowing professionals from specific countries to access the BOC exam process, to reviewing individual applications on a case by case basis, to requiring all candidates to obtain a degree from a BOC-accredited program in Canada. The development of a bridging program by an accredited school was also considered, however the small number of candidates does not make this a feasible option for the schools.

For the most recent version of this policy, the BOC has developed a multiple choice question equivalency exam to assess the academic competencies of a foreign-trained environmental public health professional seeking CPHI(C) designation. The blueprint for the multiple choice exam is the same as what is used for the design of the oral exam: 40% food safety; 15% water, 15% non-communicable disease; 15% communicable disease, and 15% fixed premises (non-food). All questions selected for the multiple choice exam are based on the latest BOC Instructional Objectives in proportion to this blueprint. A consultant with experience in educational design and assessment was hired to verify the exam design and to verify that the multiple choice questions were written at a level appropriate and equivalent to a Canadian baccalaureate degree level.

8.4 Candidate Requirements

- (c) To ensure that only candidates with relevant education and experience qualify to sit the equivalency exam, the BOC must review and approve the application of the candidate which contains the following proof of qualification and experience:
- A baccalaureate or master's degree in the discipline of environmental public health,
 - educational experience that prepares the candidate to practice as a certified EHO / PHI in their country,
 - certification as an EHO / PHI from an association or organization that is a member of the International Federation of Environmental Health, and
 - a minimum of six months experience as a certified EHO/PHI, in which the experience aligns with CIPHI's Discipline Specific Competencies (<https://ciphi.ca/wp-content/uploads/2022/03/CIPHI-Discipline-Specific-Competencies.pdf>), and
 - proficiency in written and spoken English and/or French.
- (d) Candidates must be familiar with the CIPHI Code of Ethics (<https://ciphi.ca/wp-content/uploads/2021/09/CIPHI-Code-of-Ethics.pdf>) and Standards of Practice (<http://www.ciphi.ca/pdf/practice.pdf>).

8.5 Application for Eligibility to Challenge the Equivalency Exam

- a) Every application for recognition shall be submitted on Form H – International Candidate Application Form (found in Appendix L) and accompanied with the following:
- i. The application fee as set by the BOC in Policy 6.

- ii. Documented proof of qualifications, including the transcript of marks obtained outside of Canada, such as an academic degree in the discipline of environmental public health.
- iii. Transcript of marks.

- (e) The equivalency exam consists of 100 multiple choice questions, covering a cross-section of the latest BOC Instructional Objectives and five (5) main learning areas: communicable disease, non-communicable disease, fixed premises (non-food), food, and water.
- (f) The candidate will have up to four (4) hours to complete the exam.

8.7 Exam Locations and Dates

- (a) Equivalency exams will be convened on a regional basis based on the location of the applicants.
- (b) Equivalency exams will be held on a date set by the BOC.
- (c) Qualified candidates will be given sufficient advance notice as to the time and location of the equivalency exam.

8.8 Examination Scores and Outcomes

- a) Candidates must achieve a minimum overall score of 75% to be successful on the equivalency exam.

- e) This shall not be construed as an attempt to prevent the transmission of information necessary to conduct the exam or to mark the exam.

8.10 Exam Security

- (a) Candidates must be supervised during the entire examination period by an Exam Coordinator or by a designated exam proctor.
- (b) Electronic devices, including cell phones, are not permitted in the examination room at the time of the equivalency exam. If an electronic device is brought into
